

Crocodile Cable Carrier

- The most tested cable carrier on the market
- Engineered for strength, balanced with lightweight materials
- Long operational life & easy single operator deployment

- In basket harness quick release system
- Cable harness swap out in minutes
- Zero downtime due to harness/connector serviceability issues

- All aluminium construction
- Lightweight, easy manoeuvrability
- Corrosion free & minimal maintenance

- Knuckle joints extensively tested - 78,000 cycles
- Self-lubricating bushes & other high-end components
- Designed to offer best in class critical asset ROI

- Articulated knuckle joints (+/-3°)
- Reduced structural stress due to uneven apron surface
- Longer life, less maintenance

- Designed with FEA analysis
- Manufactured using the latest engineering design software
- Best in class engineering for critical operational assets

- AS/EN 9100 approved supplier
- Manufactured to aerospace standards
- Trust in highly capable manufacturer

- Compact stowed footprint
- Less apron space used
- More apron space available for other assets

- Low rolling resistance castors - polyurethane tyre on polyamide wheel
- Resistant to Skydrol and de-icing fluids
- Allows easy, rapid deployment
